

# DEVELOPING DATA

In early 2008, UCAOA revamped its annual survey in conjunction with researchers at Massachusetts General Hospital and Harvard University with the goal of assuring that the UCAOA Benchmarking Committee's efforts produced a scientifically valid report. Here, we present some of the data from this landmark survey.

*In this issue:* What occupational medicine services—if any—are most commonly available in responding urgent care centers?

## OCCUPATIONAL MEDICINE IN URGENT CARE

The question regarding occupational medicine was just one segment of a section of questions on services offered in urgent care centers. Future Developing Data pages will offer insight into lab tests processed on site, other diagnostic tests performed on site, and orthopedic-related services.

Acknowledgment: Data submitted by Robin M. Weinick, PhD, at the time of the survey assistant professor, Harvard Medical School and senior scientist, Institute for Health Policy, Massachusetts General Hospital. Dr. Weinick is also a member of the *JUCM* Advisory Board. Financial support for this study was provided by UCAOA.

If you are aware of new data that you've found useful in your practice, let us know via e-mail to [editor@jucm.com](mailto:editor@jucm.com). We'll share your discovery with your colleagues in an upcoming issue of *JUCM*.
