

In each issue, *JUCM* will challenge your diagnostic acumen with a glimpse of x-rays, electrocardiograms, and photographs of dermatologic conditions that real urgent care patients have presented with.

If you would like to submit a case for consideration, please email the relevant materials and presenting information to [editor@jucm.com](mailto:editor@jucm.com).

FIGURE 1

The patient, a 23-year-old male, presented with knee pain and trauma.

View the image taken (**Figure 1**) and consider what your diagnosis would be.

Resolution of the case is described on the next page.

THE RESOLUTION

FIGURE 2

Diagnosis: The x-ray reveals an incidental blastic lesion. Always look at all bony segments, even those unrelated to a patient's presentation. Further work-up is necessary for this patient.
