

URGENT INTERACTIONS

“Work out or do something you’re especially good at before your shift. You’ll feel more confident at work.”

— **Joshua W. Russell, MD, MSc, ELS, FCUCM, FACEP**
JUCM Editor in Chief

“The chart needs to tell a story...with a logical beginning, middle, and end.”

— **Michael Weinstock, MD**
JUCM Senior Clinical Editor

“Pediatric respiratory presentations, including asthma, are the leading cause of pediatric urgent care visits. However, the management of asthma in the pediatric urgent care is not well-studied. Further studies on the nature of presentations and standardized management of asthma at the urgent care will provide significant and impactful insight.”

— **Richmond Darko MD, MPH, FAAP**
Associate Medical Director of Quality, Urgent Care Centers Nicklaus Children’s Hospital, and Author of “A Pilot Quality and Feasibility Project Focusing on Clinician Use of an Order Set for Acute Asthma Care in Pediatric Urgent Care Centers” (Page 37)
